

Donate Pennies

Who says a penny does not matter?

Give a Cent

Here is a world that revolves around “me” and an individual’s wants. It is ironic because we are miniscule compared to the vastness of the world in which we live. Sometimes the greatness of the world overpowers an individual and he or she feels alone and unable to accomplish a task greater than themselves. This feeling is common but there is a cure out there.

The Donate Pennies Organization is here to help make an individual feel significant in this large community and create a conscious society. This organization accepts monetary donations of any value and then forwards these gifts to people facing genocide.

The organization compares an individual to a penny. Each penny is small

Give a gift to the Donate Pennies Organization and help those facing genocide.

and insignificant compared to other monetary values, but each penny makes a difference in the lives of people in need.

Individuals that donate to this organization can become a part of something larger than themselves. It creates a society with a consciousness that is focused on

helping others. This turns the “me” world into a “we” world.

Each individual has the ability to make a difference by providing a monetary donation to the Donate Pennies Organization. Together “we” have the ability to change the consciousness of the world while helping those in need.

The Wishing Well

Walking by a wishing well, individuals will take some extra change, throw it into the well, and make a wish. Some of these individuals believe that the small amount of change he or she throws into the well has the power to make their wish

come true. This belief is true. Instead of throwing extra change into a wishing well, consider throwing extra change into the Donate Pennies Organization. The extra change collected from individuals is combined and then given to people in need. This

change not only makes the wish of one individual come true like the wishing well in the beginning, but makes the wishes of many people come true. This money can alter the lives of people facing genocide and create a new consciousness in individuals.

Volume 1, Issue 1

June 24, 2009

Special points of interest:

- Individuals have value and significance just as pennies.
- Each individual can make a difference by providing a donation.
- Working together, individuals have the ability to help others and create a new consciousness.
- Make the wishes of people facing genocide come true by donating extra change.
